7	A. That is correct. Let me just clarify.	7	A. That I believe so, yes.
8	So if we had if Lehman had a contract with	8	Q. Okay. And that second bucket of so
9	Vendor A and it was listed on Vendor A was	9	obviously at this point in early October,
10	listed as it was assumed by Barclays, well,	10	Alvarez understood the first bucket of contracts
11	under Vendor A, there may have been different	11	that were assumed, the Closing Date Contracts,
12	there may have been 20 different contracts set	12	right? They had a list of those and they knew
13	up with Vendor A. So we don't know if they took	13	what the contracts were assumed by?
14	all of them at the time or if they took two of	14	A. Again, I'm referring to I don't

20	Barclays, one bucket was the Closing Date	20	saying?
21	Contracts which were listed as of a	21	A. That is, right.
22	approximately September 18, 2008 before the deal	22	Q. In terms of the second bucket, what

7	later to lower the administrative claims.	7	A. I'm familiar with the Epiq Website,
8	Does that make sense to you?	8	yes.
9	A. Yes, it makes I see what you're	9	Q. Okay. So that would show
10	saying, yes.	10	obviously, as of closing, that had the Closing
11	Q. And so, you know, pursuant to Mr.	11	Date Contracts, right?

15	on which contracts Barclays was assuming and	15	contracts, right?
16	which contracts they were not assuming?	16	A. I don't believe all the cure amounts
17	A. Several efforts were made to keep up	17	were on there. I don't recall if all the cure
18	with that, yes.	18	amounts were on there.
19	Q. So, in roughly the October time	19	Q. Okay. The and then the Epiq, at

Are we referring to the close of the adjustment period as opposed to the availability of the flow of information into GFS; is that correct? MR. THOMAS: Objection to form. A. On the trade date plus one morning, the reports are available, but the data keeps changing continuously because of the adjustments that come through during the day. Q. So if one were to access the system say at 8 P.M. on September 12, is it fair to say that feasibly some of the information has already flowed into the system and one would be able to see what systems had already flowed in? MR. THOMAS: Objection to form. A. On for like let's can we take an example like September 12?

- Q. Okay. Any of the other people that we've gone through on the list did you speak with them in preparation for you testimony today?
- A. Well, I speak routinely to the people in the in-house legal team, Bill Olshan, Tom Hommel, Martha Solinger. I wouldn't say I spoke to them specifically on the subject of this deposition. But the other people -- I did not speak to those people directly in connection with my preparation.
- Q. Okay. For example, Catherine Muller, did you reach out to her for purposes of getting ready for the deposition?
 - A. No, I did not.
- Q. Okay. And what did you do for your preparation with respect to your role as the Alvarez 30(b)(6) witness today?
- A. Again, I reviewed the material that was filed in connection with our Rule

Page 21

P. KRUSE - HIGHLY CONFIDENTIAL 60(b) motion, the other Rule 60(b) motions by the other interested parties, the exhibits thereto. I met with counsel. I had conversations -- a brief conversation with Jim Fogarty, really to just introduce Jim to the Jones Day firm, making him aware that Jones Day would be reaching out to him to schedule his deposition. We did try to speak to Jim in the last couple of days but he is currently -he left A&M, as you may know, and is currently the CEO of Charming Shops. And I understand he was embroiled in a preparation for and participation in a board meeting for his company. And we haven't been able to speak to him in the last couple of days.

I spoken to Brian Marsal recently in connection with my preparation. I've spoken to John Suckow in connection with my preparation.

- Q. Anyone else?
- A. Not that I recall, as I sit here.
- Q. What information did you learn from Mr. Marsal?
 - A. I just generally spoke to him

Page 20

P. KRUSE - HIGHLY CONFIDENTIAL about his perspectives on what we as a -- we as a firm, A&M were focused on. And how they related to some of the material I saw.

And I'm sorry. I should back up. In connection with my preparation I also reviewed various e-mail communications that were produced as I understand it in this matter that involve communications A&M was involved in. And I would have spoken to Brian to get his perspective on some of the material that I'd seen up to that point in my preparation.

- Q. Okay. And what information did you learn from Mr. Suckow?
- A. Again, it would have been a similar nature, to try to get a perspective on some of the material I'd seen in connection with my preparation.
- Q. So from LBHI you reviewed the Rule 60 motions and you met with counsel. That was pretty much the extent of your getting prepared to be answer the questions for LBHI; is that correct?

MR. TAMBE: Objection to the form

P. KRUSE - HIGHLY CONFIDENTIAL of the question.

- A. I would agree with that but would also just add a point of emphasis that because of the work that we had been doing up to this point I was generally aware that the people that are currently at the estate did not have substantial knowledge of the transaction. So I didn't feel an immediate need or utility that would be served by seeking out some of these people you named.
- Q. Okay. In any event, you didn't seek them out or talk to them.
- A. Not in connection with the preparation itself, no.
- Q. Okay. Let me go ahead and hand you an exhibit that's already been marked that's the Asset Purchase Agreement.

I might try to start with the most boring stuff first while we're all still awake. And basically what I'd like to do is basically walk through -- and this really relates to topic number 1 in the deposition notices and just walk through and ask you about valuations that were made or not made

Page 23 Page 22 1 P. KRUSE - HIGHLY CONFIDENTIAL P. KRUSE - HIGHLY CONFIDENTIAL 2 2 with respect to the assets and then the Q. Okay. How about LBHI? 3 3 liabilities. A. - Q. Okay. What was -- what did Lazard do that week to try to get a better sense of how the marks had evolved from Friday, September 12th, 2008?
- A. My general understanding is that Barry Ridings and perhaps others from Lazard were observing the course of the activities as a deal was being negotiated on I believe the 30th floor at the 745 building. And observed various meetings amongst certain of the parties that were involved. You know, based on the record I've seen, very unclear to me the degree to which they were able to ultimately fully understand and appreciate how Hugh the marks evolved as it's characterized here in this e-mail.
- Q. When you say observing the course of the activities, what are you referring to in particular?
- A. Observing the conduct of the people talking to each other in the course of the negotiations. Just being in various

Page 83

- P. KRUSE HIGHLY CONFIDENTIAL meetings, various rooms, as multiple aspects of the transaction were being discussed. I don't have much specifics beyond that. I really think the question is ultimately best directed of course to Lazard representatives.
- Q. Is it your understanding that the long positions referenced in the APA, the original APA, had a total approximate value -- or strike that.

What is your understanding of what the long positions value was marked as on Lehman's books as of September -- Friday, September 12th, 2008?

MR. TAMBE: Objection to the form of the question.

A. The long positions that are contemplated in the 9/16 APA?

Q. Yes.

A. Stated in the APA at \$70 billion, roughly.

Q. Approximately.

A. And you're asking me about my knowledge of the value of those securities on September 12th?

Page 84

P. KRUSE - HIGHLY CONFIDENTIAL

Q. Yes.

A. Okay. I don't think I have a specific understanding as I sit here of that. I think it's perhaps something we've looked into but I don't -- as I sit here I don't think I can tell you a specific relationship.

- Q. Have you seen assertions in some of the Rule 60 motions that those marks were valued at closer to 75 billion on Friday, September 12th?
- A. The assertions I've seen are not specific to the date. I generally understood the assertions to be contemporaneous with the day that they were being talked about.
- Q. Well, after the Lehman bankruptcy, after -- what knowledge do you have as to whether there was any efforts -- strike that.

What efforts are you aware of to mark those long securities, that is to put a value on them, after September 12th, 2008?

MR. TAMBE: Objection to the form of the question.

A. I'm sorry. Would you please repeat that?

MR. TAMBE: Objection to form.

A. Well, the -- I understand that they were -- Lehman was continuing to operate as close as they could to business as usual, understanding, of course, under the circumstances there were I'm sure a lot of challenges there given that the parent company had filed for bankruptcy on the morning of the 15th. And, you know, the efforts I understand were continuing to value securities in the course of that week.

Q. And who was continuing to value securities during the course of the week?

A. I can't speak specifically. I've heard -- Ian Lowitt, as you're probably aware, testified in his deposition that he believed the marks were accurate as of the dates that they were stated in Lehman's books during that week.

Q. Other than Ian Lowitt's deposition

MR. TAMBE: Objection to the form.

- A. Since the data was delivered to us through what people are currently Barclays employees, I think they would have the best understanding of what specifically those numbers were and what they were based on.
- Q. I understand that. But I'm just asking what you know. We can ask them separately. It says stale marks. I'm just treating to think are the stale marks the ones that are, you know, five days old, three days, old, go back to September 12th? I mean, do vou know?

A. I generally -- my current understanding is that the values ascribed at this time, that was the value that the entity as a whole was ascribing to these securities at the time the deal was closed. I don't know that I accept the characterization of them

Page 115

P. KRUSE - HIGHLY CONFIDENTIAL being stale marks based on what I know now. At the time we obviously had a belief or an understanding that they were thought to be stale marks.

Q. And have you learned since then that -- I mean, do you know whether those people -- whether those marks were updated through the week of September 15th?

MR. TAMBE: Objection to the form question.

Q. And the way you phrased it was it was continued to be the value, understanding that the values ascribed at this time. It's a little more specific. Do you know -- I think you've said you don't know earlier but do you know whether these marks were updated through the week -- by someone at Lehman through the week of September 15th?

MR. TAMBE: Objection. Asked and answered.

A. Yeah, I think I'd refer back to what I believe I testified to a few moments which is I had a general understanding that they were attempting to do business as usual

Page 116

P. KRUSE - HIGHLY CONFIDENTIAL

and keep the marks current. And there was also the ongoing contemporaneous marking process that was done by their clearing bank.

Q. And that's based on Ian Lowitt's deposition testimony?

MR. TAMBE: Objection to form.

- A. I don't think it's based solely on that. It's based on an aggregation of my understanding.
- Q. Is it just the aggregation we talked about earlier in the deposition?
- A. It's based on a -- you know, a series of -- the information I've gathered and absorbed in the course of being involved in this matter.
- Q. Is there anything else specific --I mean, can you -- you read the deposition testimony. You've read, you know, the motion paper -- the litigation papers.

Have you talked to someone who said they were updating their marks that week at Lehman?

A. Again, I'm aware that the clearing banks, JPM was doing contemporaneous marks. Page 117

P. KRUSE - HIGHLY CONFIDENTIAL

That's their responsibility as the clearing agent. Bank of New York who was -- these securities were being transferred to was doing their own independent valuation or ascribing their own independent values to it. There were -- you know, there wasn't just one source of value during this week.

Q. I'm asking about Lehman. Other than Lowitt's, Mr. Lowitt's testimony, do you have any knowledge that Lehman was updating these marks during the week?

MR. TAMBE: Objection, asked and answered.

- A. I believe it was asked and answered. And I believe they were attempting to continue to mark the books on a daily basis.
- O. And that belief is based on what other than Mr. Lowitt's testimony? And they being Lehman. So not BNY or JPM or the clearing or anything else.
- A. I can't tell you specifically the single item or the series of items that lead me to believe that that was the case. It's

Page 118 Page 119 P. KRUSE - HIGHLY CONFIDENTIAL P. KRUSE - HIGHLY CONFIDENTIAL 1 1 2 2 quite possible if I go back and review As to the -- you know, the 3 3 material I'll be convinced otherwise. But distinction between Mr. McDade's testimony and 4 4 Mr. Lowitt's, I'm aware of the contradiction sitting here today it's my general 5 understanding that the marks were being 5 there. If I were to choose between the CFO 6 updated by Lehman continuing on a daily basis. 6 who is closer to the marking process on a 7 7 Q. Did you see Mr. McDade's testimony daily basis than a chief operating officer 8 8 that he didn't believe that they were being which I believe was Mr. McDade's title I'd 9 9 updated? probably take the CFO in that context. 0 10 Q. I really want to move on. I just A. I do recall seeing that testimony, 1 11 want to be very specific. I just need to know yes. 2 12 Q. Okay. So we have Mr. McDade if there's some other specific basis you have .3 13 testifying that he believed they weren't being for believing there were marks being updated 14 by Lehman that week other than Mr. Lowitt's updated. We have Mr. Lowitt's testimony. Is .5 there anything else specific that anyone at 15 testimony. A. Difficult for me to characterize numbers of people. It was a substantial part of our effort at that point. I think as it relates to Barclays in particular, our focus was on, you know, bearing in mind, of course, that the business and all of its systems, its records, all of its systems, and substantially all of its employees were being moved over to Barclays. The TSA, the Transition Services Agreement, was the primary focus of ours as it related to Barclays at the time. And so the numbers of people -- there's within this October 8th dec I think there's some depiction of the numbers of people that we were gearing up with at that time. But a substantial portion of those people were involved in this effort across multiple asset classes and multiple teams that I think is probably best

A. No, again, I would characterize, you know, what we were doing at this time relaying information that had been given to us in connection with that transaction to our UCC constituency. Some aspects of which they may have known more than we did at the time because they had perhaps people involved as the deal was happening that weekend whereas we did not. Did we take action? This was not a priority at the time. We were not -- again, as it relates to Barclays, the TSA was our primary focus. Getting ourselves in a position where we could run the wind-down of this enormously large operation in a competent

- Q. Are you aware of anyone else who expressed surprise or indicated that that was news to them? Anyone at Alvarez or LBHI or anyone at this period of time?

MR. TAMBE: Objection to form.

A. My recollection during the first quarter of our administration of the estate, there was a gentleman from Houlihan, I believe

Pg 114 of 214 Page 158 Page 159 P. KRUSE - HIGHLY CONFIDENTIAL 1 P. KRUSE - HIGHLY CONFIDENTIAL 2 2 Mike Fazio, who I think primarily indirectly that was shown to Mike and/or others at 3 3 through others I understood that he was Houlihan. 4 I remember Mike telling us that expressing some concerns about the economics 4 5 of the deal and whether it was ultimately in 5 they, meaning as advisors to the Unsecured 6 the best interest of the estate to have the 6 Creditors Committee, had been asked -- had 7 deal done as it was papered. I -- you know. asked Barclays and Lehman people for the 8 8 details behind the difference between the Q. And they were very unhappy with the 12 12 concern more general or particularly with fact that they had never gotten any details. 13 13 respect to there being a delta between the They were promised the details at the time and 14 agreed value of the -- we'll call it the 14 they never got them. And I think that was 15 discount as you've used the term. 15 part of what was underlying their concerns 16 16 about the economics of the deal. A. My best recollection is that Mr. 17 17 Fazio was either -- attended or had heard Q. So they were aware of the delta 18 firsthand about a meeting that I know has been 18 but they wanted to get details about the delta 19 19 depicted in the prior discovery Sun -- I further explained. 20 A. Sure. What does that term mean to you? 2 A. Well, in the context I know where 12 and the comp and cure obligations being 13 3 assumed. And then you've got an additional you're coming from, it's assets essentially 4 equalled liabilities. And there was little to 14 element of consideration if you want to look 5 no exchange of economic value in the deal. 15 at it that way by virtue of, you know, other 16 .6 Q. Okay. A. Well, what I'm describing I think

is depicted in our Rule 60(b) motion. I can

MR. TAMBE: Objection to the form of the question and beyond the scope of the 30(b)(6).

- A. As I mentioned, I have a lot of uncertainty as to what securities are even being referred to there. So it's a difficult -- I can't even answer the question because I don't have a premise from which to answer.
- Q. So you weren't even sure which securities were in the deal.
- A. It's not clear to me, no. And when I say in the deal, I'm talking about the RESI assets referred to in the APA.
- Q. All right. Turning to 464A who is W. Gordon? William Gordon?
 - A. He's an Alvarez & Marsal employee.
- Q. And this appears -- this may just be a further chain that attaches some of the information from Weil but I just wanted to ask you about a couple other names on here. Who is Mary Karitsky?

Page 171

- A. Mary Kariky.
- Q. Kariky.
- A. She's an Alvarez employee as well.
- Q. Okay. Were they also working on analyzing the sale transaction in terms of what assets went over?
- A. Yes. That was part of their mission, among I'm sure many other things at the time.
- O. We talked a little bit earlier about this wash notion that appears in some of the litigation papers.

Can you point to any part of the sales documents that require the deal to be anything like a wash, that place restrictions on what the amount of the assets and liabilities have to be?

MR. TAMBE: Objection to the form of the question.

A. I thought we just discussed that. I described the depiction of the long and the shorts as described in the APA and how that balanced out.

Q. Right. And you referred to the

Page 172

MR. TAMBE: Objection to form.

- A. And you don't want me to repeat, I assume, what I've already talked about in terms of the APA having an implied sort of balancing aspect to it? That's the primary thing I would look to.
- Q. Well, the terms you referred to in the APA came out of the deal because those assets couldn't be delivered, right?
- A. Well, that's one way to characterize it. Another way to think about it is that there wasn't even a specific listing of those assets at the time. That was people's best estimate of what was on the balance sheet of LBI, as I've gleaned from the discovery at this point. The idea that they couldn't be delivered may in my mind go too far.

The nature of the assets in a broker/dealer are going to change day-to-day because of the typical machinations in and out of a broker/dealer. But there certainly were less assets available later in the week than

P. KRUSE - HIGHLY CONFIDENTIAL

APA and your belief that maybe there was some balance there between long and short. That, of course, the APA had to get modified because Lehman couldn't deliver those assets. And so in terms of the transaction that actually went through, the purchase agreement that actually -- or the actual deal that was agreed to and closed, is there anything in there that you're aware of that in your mind could be considered to require that after some post-doc analysis that liabilities and assets had to somehow balance out?

MR. TAMBE: Objection to the form of the question.

- A. It's a very long question and I lost track of some of the characterizations early on and I'm not sure I accept some of the early characterizations that sort of formed the premise of it but...
- Q. Okay. You've described your kind of understanding of the term wash, and I'm asking you is there anything that you can point to in the sale agreement, in the purchase agreement that required the deal to

Page 174 Page 175 1 P. KRUSE - HIGHLY CONFIDENTIAL P. A. All right. I'm going to try to make sure I understand the question there. Again, I lose track when it goes on.

The Lehman -- you know, the same thing Lehman versus Alvarez & Marsal. Lehman people were clearly knowledgeable about this. They were the people that were getting some offers to some extent. They were the people who were right in the middle of this. All those people that we're talking about are no longer employed by LBHI. They've gone on to Barclays or they've gone their own way.

So the short answer to your question is yes, LBHI was aware of this at the time. They were inherently aware because they were part of it.

Q. Okay. Sorry I'm pausing but I'm actually cutting stuff out. So it's a productive pause.

(Pause on the record.)

Q. Let's move to the cure and comp figures, which I believe is one of the depo topics.

Can you tell me everything you know either in your capacity as the LBHI or Alvarez witness about how the comp figure referred to in the purchase agreement was derived?

A. At what point in time? I'm just -- I want to make sure -- the topics seem to focus on what we knew at the time the deal was being done, and I think we've established we knew nothing about this deal at the time.

02 Page 203

P. KRUSE - HIGHLY CONFIDENTIAL So at what point in time? You know, there's been a lot of discovery on that topic. I'm just trying to narrow down what you want from me.

- Q. Okay. Let's start with -- let's start with what you know now at any time. So your total knowledge of what the comp figures were.
- A. Total knowledge of what the comp figures were. Do you mean total knowledge of how it was derived in the context of the deal?

Q. Yes.

A. Well, our current knowledge is embodied in the discovery and Rule 60(b) motion and the exhibits thereto, but if I can try to characterize that as best I can sitting here now, I think there was real confusion in the record thus far as to whether that was derived by Lehman people and given to Barclays or whether it was a negotiated amount. I know I've heard in some ways contradictory testimony from people as to how they derived that number. And I have some lack of clarity sitting here even today as to specifically how

Page 204

P. KRUSE - HIGHLY CONFIDENTIAL the number was derived.

Q. Other than just kind of reading testimony and litigation materials, do you have any knowledge as to how that was -- the comp number was derived, such as by speaking with people at Lehman or speaking with people at Alvarez or review of Lehman documents?

A. Well, I'm not familiar and I could be not remembering this correctly, but I don't recall that there was any sort of empirically derived build-up of how the number was put together at that time. I've never seen a schedule that says here's our comp accrual. Here's how we're building this up for purposes of a negotiation what the number should be. I don't have an understanding of that kind of support for it.

Q. Um-hum. Was it your understanding that the comp figure included severance as well as bonuses?

MR. TAMBE: Objection to the form of the question.

A. No. I think severance is in a separate section of the agreement. Severance

Page 205

P. KRUSE - HIGHLY CONFIDENTIAL is 9.1(b), if I'm not mistaken. Bonus is discussed in 9.1(c). So I think it's a separate concept, as I understand it.

Q. Let me go ahead and show you a document we'll mark as 469A.

best recall.

Q. I think I asked you before. Brett

Poldrer do you know if he's still at Lehman?

The topic is just when Alvarez 4 acquiring the repo collateral, the clearance 4 understood that Barclays acquired the repo 5 collateral, the clearance box assets, the 5 box assets, the 15(c)3 assets and the 6 exchange-traded derivatives, and the margin, 6 15(c)3 assets, the exchange-traded derivative 7 and the margin. If it wasn't -- it was 7 with respect to you, Alvarez, and we can go 8 8 roughly in that time at least within a week or back through these exhibits if you want, but 9 certainly as of the e-mail description of the 9 so after closing. And on the liabilities, 6 6 just to bear down a little bit on what you of the question. A. As I sit here right now, I know 7 learned that was new after October about the 8 8 some of the work that we were doing in liability amounts. A. We talked about this. I'm not 9 connection with the sale motion order that was 9 0 10 approved by the court on I believe December exactly clear what the distinction, the 11 11 23rd of 2008, we were doing some work to importance is of October. But -- because I 12 2 understand all the facts and information laid think I already testified -- I believe it was 13 13 toward the end of December 2008 when our out in that motion along with the declarations 14 4 attached. So we were learning probably new finance team was finalizing the closing of the 5 things at that point about the 7 billion. I 15 filing date books and records. I hope the record 24 is clear on that point but we were not 24 deal after the end of September? A. You mean other than everything 25 attempting in the first quarter of the

Page 238 Page 239 P. KRUSE - HIGHLY CONFIDENTIAL P. KRUSE - HIGHLY CONFIDENTIAL 1 2 2 administration of the estate to do a O. If it had been a priority for you 3 3 full-blown valuation of the economics of the and you had tried to do that analysis earlier 4 4 deal. There were things that came to our at the time end of September, early October, 5 5 are there any facts about assets and attention toward the end of that quarter that 6 gave us cause for concern and resulted in us 6 liabilities that you did not have that would 7 7 have prevented you from doing that analysis? putting more focus on it. 8 8 Q. Okay. And I understand what MR. TAMBE: Object to the form. 9 9 you're saying about increased focus and not A. There was a very difficult process 0 doing a full-blown economic analysis. I'm 10 we had for getting any information from .1 just honing in on particular specific facts. 11 Barclays. I think I referred earlier in my 12 12 There's one thing -- it seems to me you had testimony to extraordinarily difficult 13 13 the facts but you didn't focus on them and do circumstances in getting Barclays to execute 14 14 a full-blown economic analysis. Is that a under the TSA. That big focus that we had as .5 fair summary of what you're saying? 15 it related to Barclays as an entity was 16 6 MR. TAMBE: Objection to the form. getting performance of the TSA. We were at 17 17 A. We had certain limited facts as a Barclays' mercy in terms of needing their 8 18 result of trying to gain an understanding employees, their systems, their information, 19 19 early on of what went over and what didn't go their insight. That was the focus, the 20 20 over. We were not attempting to immediate most important focus for us early on 21 21 comprehensively evaluate the detail in its in the administration of the estate. If we 22 22 totality at that stage of the administration didn't get that right a lot of things were 23 23 going to go wrong. That was the priority. We of the estate. It was not a priority. There 24 were a lot of other things we felt were a 24 weren't focusing on the Barclays deal at that 25 higher priority at that state. 25 stage. It would have been in my mind Page 240 Page 241 P. KRUSE - HIGHLY CONFIDENTIAL 1 P. KRUSE - HIGHLY CONFIDENTIAL 1 2 2 irresponsible to put an emphasis on that information we've seen in these e-mails today 3 3 versus the higher priority of getting the where we got the CUSIP level detail of what 4 information in hand that we needed to minister 4 came over, there were repeated problems in 5 and run the estate. 5 performance under the TSA. It almost resulted 6 6 O. I appreciate that. And you're in a lawsuit being filed. I mean, we had stating that very strongly and it's 7 it -- we had the lawsuit drafted and it was 8 8 understood. I just want to know if you didn't going to be served if we didn't get 9 think there was any facts in terms of the deal 9 cooperation. That's the degree to which the 10 in terms of what assets and liabilities were 10 performance or the lack of performance under 11 transferred that you didn't have by the end of 11 the TSA was a concern of ours. 12 September. 12 So if you're talking about facts 13 13 MR. TAMBE: Objection to the form that we knew or didn't know, there were -- the of the question. 14 14 entire process was breaking down under which 15 A. Yes. There were facts that we 15 we needed to administer to the estate because 16 16 didn't have about the deal at the end of of what we felt was the failure to perform 17 17 September. Certainly there were many facts we under the TSA by Barclays. There were 18 18 didn't have. significant issues that just administering the 19 Q. What if any facts would have 19 estate was becoming -- in an appropriate 20 20 prevented you from doing the economic analysis fashion was becoming an issue. 21 21 that you're doing now? To put an emphasis at that stage 22 22 A. I will again try to communicate on looking back at a deal, again, that was not 23 the issue we were dealing with. We weren't 23 the focus at the time. It evolved to be a 24 24 getting information openly from Barclays. focus. But we weren't focusing on that in the

I'm just summing up the 5 It's just -- I just want to know if you -- if 5 things we've gone through and it wasn't that 6 by the end of September you understood that 6 you learned new facts -- you -- strike that. 7 7 assets that were transferred and the You understood that assets that 8 8 liabilities assumed and the fact that there were transferred as part of the deal and the 9 9 was a delta between, you know, Lehman marks, liabilities assumed including the delta 10 whether they were stale or not, and the kind 10 between what one document referred to as stale 11 of agreed value of the assets for purposes of 11 marks and the value put on those securities by 12 12 the deal, what's referred to in your documents the parties, I mean, you understood all that 13 13 as the discount, you understood those things, by the end of September, correct? 14 14 MR. I was not involved in the negotiation of the transaction and we did not receive any of the information in terms of what we were receiving until the deal was made public. Q. Q. So turning back to Deposition Exhibit 808B, is it your testimony that you're not aware of anyone the Monday of Mr. Teague's e-mail providing the pricing support discussed in his e-mail?

MR. THOMAS: Objection to form.

- A. The e-mail dated Monday, September 22, contains pricing support for assets that would have come from Sean's area of expertise. There's nothing in here that would have come from my group.
- Q. My question is simply, around the time that Mr. Teague's e-mail goes out September 15, whether you're aware if your team also got involved in the process of pricing support related to the Lehman transaction?

MR. THOMAS: Objection. Form.

- A. Once we were informed that there would be securities for us to price, we would have been involved in pricing those securities.
- Q. So that could have been as early as September 15; is that correct?
 - A. If we knew what we were getting. I

(Exhibit 809B, a document bearing Bates Nos. BCI-EX-(S)201104, marked for identification, as of this date.)

- A. Okay.
- Q. Mr. Landreman, do you see that this is an e-mail from Mr. Teague to yourself CC-ing Joseph Kaczka, dated September 19; is that correct?
 - A. Correct.
- Q. And do you see in the body of the e-mail Mr. Teague writes, "Rich, Marcus wanted the different price testing team pitch in to get an idea of how the Lehman positions are priced as of 15 September. Can you ask your team to perform some independent pricing on the following spreadsheet?"
 - A. I see that.
- Q. Do you recall if this was positions that had already been transferred to Barclays that you were being asked to pitch in and help with price testing?
- A. I don't recall what was in these files, but I'm sure if I saw what was in

- Q. Do you recall being involved in the valuation of the securities that were transferred over in the Lehman/Barclays repo the evening of September 18 either on that Friday, the 19th, or Thursday itself?
- A. I do not recall being involved in the Lehman/Barclays repo pricing or the information from that as of that date.
- Q. In your mind, was the exercise that you and your team was asked to undertake related to the Lehman transaction and the securities that Barclays was acquiring as opposed to any specific repo transaction?

MR. THOMAS: Objection to form.

- A. My understanding was that the assets that were pledged to secure a repo line of credit were being brought onto our balance sheet and needed to be assigned a fair value on our balance sheet as of the date that they were going to be effectively put on our balance sheet.
- Q. And do you recall being immersed in that process from the moment that the positions

HIGHLY CONFIDENTIAL - Landreman were transferred over?

MR. THOMAS: Objection to form.

- A. I was immersed in that process for months.
- Q. I'm trying to get a feel for when it began. Did the process begin two days before delivery of the assets or did it begin immediately upon transfer of the assets?

MR. THOMAS: Objection to form.

- A. I don't know when all of the assets were officially delivered. That would be an operations question. I know that I was given lists to price and to review at various points in time and there would be different updates to those lists at points in time because certain securities may or may not have been delivered.
- Q. Were you involved in the reconciliation of what was delivered and what wasn't, or would that be Operations?
- A. That would be Operations and line controller functions.
- Q. And were you involved in the creation of any of the schedules related to the transaction documentation?

And how was that used as a data point within your process? A. In many cases, if there was no data available or we were unable to model a position, we may have defaulted to a BoNY price. We did review the prices that we derived using our own proprietary methodologies to value these bonds and compared that to the levels that we saw from BoNY or JPMorgan or IDC or other vendors that

A. The key driver in a securitized product valuation is the spread information that you input as well as any assumptions as it relates to prepayments or defaults, and our assumptions on the prepayments and defaults would have been driven on more generalized market parameters as opposed to, you know, something we would have found specifically in that bond's remittance report at that month.

Q. So is it fair to say that the way it was done, the September 25th remittance report, to the extent it included any new pricing data, it really wouldn't have been used in the model?

MR. THOMAS: Objection to form.

A. We already owned a large portfolio of mortgage-backed securities, and we had been applying pricing and methodologies that were consistent with how we price our existing portfolio.

We also owned our own mortgage originator and our own mortgage servicer at the

The remittance reports generally were confirming our view of the trends that we were using in our valuations.

Q. So they were not inputs into your model, they were simply used to confirm the outputs that your model generated; is that correct?

A. Unless there was a material deviation from our expectations of the performance of a bond on any given basis, generally the updates of the remittance reports had minimal effects on our valuations.

Q. September 25th remittance reports were used and could have had some effect on your valuations, even if minimal, correct?

A. Within -- potentially.

Q. If I could have you also put in front of you what was previously marked 808B.

A. Okay.

Q. Was this matrix based on recent trade levels even where there was little trading activity?

Forgive me for being a layperson, I might be butchering the terminology here, but could you just tell me about the matrix being used for Alt A securities?

A. The prices that we observed for trades in the market was the market at the time. So there was limited trading, but there was trading. We did have a running trend of the trades so we were looking at what was happening pretty much every day for the prior six months, and every month we would calibrate these curves to the trades that we would see in the market.

So, based upon the product and the vintage and the performance of that specific bond, we would track all of the trades and use that in the process of creating these spread matrices that we would apply toward comparable

Q. And the same matrix would have been used for purposes of pricing the securities as of the acquisition date for all Alt A securities acquired?

A. The prices derived in my group would have been derived using the models that we had internally.

A. The data within the matrix would have been incorporated within the modeling of the bond.

Q. And how would the bond have been modeled? What would the next step be after you've got a matrix? Those are your inputs for your model; is that correct?

- A. The values that we derived using our internal modeling methodologies for agency CMOs.
- Q. And what was your internal modeling methodologies for CMOs, agency CMOs?
- A. We would use an internal OAS model, which we would look at observable trades, when available, and solve for option-adjusted spreads for those specific asset categories and apply that towards the portfolio by asset category.
- O. And what definition of "bid/offer spread" are you using within this methodology for determining the liquidity adjustment?
- A. I mean, in terms of applying a bid/offer, it's -- method 2 was really more of a bid/offer analysis where we showed buys and sells on the same day. We showed which bonds we bought and what we sold, and although it was not an instantaneous buy and sell, these types of transactions generally tend to be negotiated ahead of time. So you would only buy a position like this if you had an outlet to distribute it, so at least we had the observation that it went

Page 167

Page 169

HIGHLY CONFIDENTIAL - Landreman in and went out at the same day. But again, to say that it was instantaneous within the minute, I can't prove that.

In terms of method 1, that was more of a price dispersion amongst different points that were available, and the largest dispersion occurred in the categories where the majority of the bonds were concentrated. I think the last paragraph where we said that we applied a 10 percent bid/offer as a proxy, subordinated by both methods, 75 percent of the portfolio was highly structured IO, PO and Z bonds, and the majority of these bonds, you know, this supports the use of an average, as the trade sample was skewed by the high number of derivative trades reflected in the trade sample.

So the trade sample had high levels of derivatives which showed the bid/offer adjustment in the 15 to 20 percent range, which, again, when we did the original analysis on the pricing dispersion, we saw that there was a high level of dispersion amongst those derivative assets which really comprised the bulk of the portfolio.

Page 168

HIGHLY CONFIDENTIAL - Landreman

A. Correct.

Q. Okay. And how was the sample size of 39 agencies CMO bonds assembled?

A. For the timeframe that we selected, these were all the trades where we had buys and sells on the same date.

Q. Is there a point at which the sample size would not have been adequate in order to derive a liquidity adjustment from the available actual trades?

MR. THOMAS: Objection to form.

- A. Again, this analysis was a secondary analysis to support the concept of a liquidity adjustment based upon the observability of pricing dispersion, in addition to, you know, a sample of bid/offer spreads at this time in the market. It was, in our opinion, although the data may have been limited, it was the best available data at the time.
- Q. In using this benchmark portfolio in method 2, did you take into consideration whether the positions within it were inverse IOs as opposed to other types of agency CMOs?
 - A. We put the collateral or the structure

HIGHLY CONFIDENTIAL - Landreman

Q. Are bid/offer spreads generally simultaneous at a particular moment in time? MR. THOMAS: Objection to form.

A. A bid/offer spread in its technical sense for a product that trades regularly and you have observability would be, you know, as close as possible to a buy and sell instantaneously. In a market where positions are traded randomly or as negotiated sales were a buy and a sell will occur on the same day, it's considered that these bid/offer spreads would be indicative of a true, you know, almost what a bid/offer should be.

But there's lots of -- in terms of bid/offer spread on the agency CMO world, it's less clear than, say, the Treasuries or agency debentures, where there's more trading activity and more observability.

- Q. Were these actual trading prices?
- A. The spreadsheet that we provided you were actual trades with the trade date and the amount of the trade.
- Q. So they're actual trades as opposed to price indications?

A. I wouldn't know. Absolutely wouldn't know.

Q. All right. So you haven't slept for a couple of days. It's Sunday. That phase has ended. What happens next?

A. What I don't recall, what I don't remember is whether if I got calls Sunday night or Monday morning, you know. I mean, it was all -- when I tell you I, you know, if I got 90 minutes' sleep that week, it was...

TSG Reporting - Worldwide (877) 702-9580

Page 27

HIGHLY CONFIDENTIAL - G. LaROCCA

So I got a call either late Sunday night or early A.M. on Monday morning and --

Q. Just so we can have a clear record, when you say Sunday night, you're on Sunday night, the 14th?

A. The 14th or the 15th.

Okay. Q.

A. And that possible that we may buy --I'm trying to -- how I found out. Someone would have called me. I don't recall who it was called, said come back, you know, and was told we may be buying the U.S. broker-dealer, that the LBI hadn't declared bankruptcy.

And when I initially found out, I'm thinking we're buying the U.S. broker-dealer. I don't know anything about an Asset Purchase Agreement and, you know, I'm thinking we're buying a U.S. broker-dealer.

Now, my role is kind of changed a little bit now. Now I'm no longer in a kind of due diligence coordination role. I get sent over to Lehman Brothers and to sit with the ops. guys and told try to be helpful to them, they're dying, they're in -- they're in bad shape

TSG Reporting - Worldwide (877) 702-9580

Page 28

HIGHLY CONFIDENTIAL - G. LaROCCA

because, you know, JPMorgan had turned off the pipes, banks were pulling lines, counterparties were closing them out, walking away from trades. And so I was told, you know, to go over to Lehman Brothers and try to be helpful because I'm an experienced ops. guy and would have --

You know, so that kind of consumed my Monday, well, that kind of -- I was heavily involved in that the whole week, and then on -that would have been a big part of my Monday. And Monday or late afternoon, I became aware that from -- and I would have become aware from Jonathan Hughes, who told me that the Fed had reached out to him and had asked him to -- and that -- so on Monday late afternoon, I believe, I believe it was Monday, Jonathan had alerted me that the Fed was financing Lehman Brothers and they were looking for Barclays to help in some kind of way.

At that point in time, it really didn't resonate with me because, you know, I was fighting a lot of fires and, you know, trying to settle trades and leverage my relationships on Wall Street to try to get, you know, banks to TSG Reporting - Worldwide (877) 702-9580

assist and cooperate, et cetera.

On the 16th, the Tuesday, Jonathan came back to me again and said, you know, the Fed wants to meet with us, they want us to -- I don't remember the exact words -- they want us to step into their trade with Lehman Brothers. It might not have been the words he used, but the tone of what he was very different than the conversation I had with him on Monday. I remember it being very different because it got my attention on the Tuesday a lot more than it got on the Monday.

Q. Can you give me a little more detail on that? How had his tone changed? It was more urgent? It was angry? It's loud?

A. It was more urgent.

Q. Okay.

A. And said we needed to get on the phone with the Fed, okay? And Jonathan used words like if the Fed is going to support this, you know, if we want the Fed to work with us and to support this transaction that we want to try to do, that we're going to have to step into that -- we're going to have to take the Fed out

Page 30

HIGHLY CONFIDENTIAL - G. LaROCCA of my -- of their financing obligation with Lehman Brothers.

L2

I participated in a phone call with the Fed on that Tuesday, and -- and you're going to ask me who it was with, and I don't recall, and after my phone call, the urgency was evident to me and I dropped what I was doing and headed down to the Fed and I met with -- now, I'm not sure if I -- I don't know if I went down on the Tuesday night. I think so, I'm almost, I'm almost positive it was Tuesday night early evening and met with Lucinda Brickler and other colleagues of hers from the Fed.

And Lucinda had explained to me that the Fed was financing Lehman Brothers, had provided roughly \$45 billion in financing for Lehman Brothers, and that they were using -- that Lehman was using three facilities to finance collateral and the Fed had lent them \$45 billion.

Q. Do you know what the three facilities were?

A. If you say them, I'll -- one was Open Market Operations, one is --

Q. OMO?

A. OMO. There was --

Q. TLSF, yes?

A. Treasury -- TLSF sounds right. And what's the third one?

Q. PDCF?

A. PDCF. Those would be the three, right?

And they had explained that Lehman had put collateral into those three facilities and the Fed had advanced them \$45 billion, right? And they wanted -- they didn't have -- the Fed did not have a problem that if Barclays stepped into that trade, that we could use the facilities because it would take us -- they knew it would take us time to find financing, you know, financing with third parties. It would take some weeks to find financing.

So they left me with the impression they didn't have a problem -- they had a problem with Lehman being the counterparty to the Fed and were more comfortable with Barclays being the counterparty to the Fed, and them seeing a way that Barclays had, over a couple of week

TSG Reporting - Worldwide (877) 702-9580

Page 32

HIGHLY CONFIDENTIAL - G. LaROCCA period, would be able to put that collateral out on the street.

So worked with Lucinda that night, and the Fed replacement transaction was kind of developed. Told her that she was looking -- they were anxious, right? Were hoping that we could execute on Wednesday. We told them that we wouldn't be prepared. We didn't have any idea, you know, while we drew this up on the blackboard, you know, I needed to go back and figure out how it was going to work.

Q. Right.

A. And there was just so much uncertainty about data, you know, didn't know the collateral that the Fed was holding and, you know, needed to talk to our ops. people. And, you know, so Wednesday would have been a day of preparation in anticipation of beginning doing this transaction on that Thursday.

Q. So this Wednesday, the 17th -I'm putting the days in so we have a record by number as well.

A. Yeah. Yeah.

Q. So you leave the Fed, you told them

TSG Reporting - Worldwide (877) 702-9580

Page 33

HIGHLY CONFIDENTIAL - G. LaROCCA we'll do this, but I can't get it done today?

A. We're going to do it on Thursday, right? And they seemed to be fine with that. They were just, you know, they were expecting a Friday closing and seemed to be okay that Thursday was the day.

Q. Were you expecting a Friday closing at that point, too? Was that the timeline people were working on?

A. You know what, I was expecting a Friday closing. It became -- and I don't know why, I don't know where, you know, again, it could have been chatter in the -- in our facilities. It became, you know, from my personal experience, it became very evident that if it had to go through another weekend, this is personal experience, they were having a great deal of difficulty, Lehman Brothers, just getting through a day because they were flying blind.

They had -- they didn't know the status of their trades. They hadn't reconciled the bank accounts. They hadn't reconciled their stock record in several, several days in advance

Page 34 Page 35 1 HIGHLY CONFIDENTIAL - G. LaROCCA HIGHLY CONFIDENTIAL - G. LaROCCA 1 2 2 of when -- even before I got in there. I mean, try to --3 3 Q. A. Fed and JPMorgan. I'm not privy to that conversation, right? So, but the Fed came back to me and had indicated that JPMorgan was going to cooperate, right?

Q. Okay. So what happened next?

A. And because of the now the Fed wire and DTC, I mean, now we're past the deadline, right? And there was -- and we're wondering how we're going about to get this transaction done.

Q. This transaction being the --

Page 39

HIGHLY CONFIDENTIAL - G. LaROCCA A. The Fed replacement transaction given the we've already asked for extensions and the 5 billion took hours and it was trickling in and the systems weren't working, right?

O. Who do you have to ask for extensions?

A. The Fed, normally, in a normal course of business, okay, the dealer community would ask one of its two clearing banks, it would be Bank of New York or JPMorgan, right, to keep the securities wire open or the money wire open.

And it's done through a clearing bank, so the dealers don't talk to the Fed, right? On occasion, 30 years of experience, when the security wire or money wire is kept open for prolonged periods of time, sometimes the Fed will want to talk to the dealer or the participant who's causing the extension.

Q. Okay.

A. In this instance, the Fed was party to the transaction. They were, you know --

Q. They're in it?

A. So I don't know that we asked. They were going to keep it open to, you know, to help

TSG Reporting - Worldwide (877) 702-9580

Q. Got it.

A. Right? And they -- but still concerned about how this, you know, how this was going to happen and get done on time. We talked about internally at Barclays -- who? Me, Rich Ricci -- about, you know, moving \$40 billion in one go. And, you know, it's a lot of money and that decision carried kind of great personal risk for me and also tremendous risk for Barclays, and while I was given assurances that from the Fed that JPMorgan was going to play ball or cooperate, my experience that week with them grabbing collateral, them turning the pipes off at Lehman Brothers, caused me great concern and was very concerned that we would be exposed that kind of money.

Rich kicked the decision up. I don't know exactly the conversation that he had with Bob, but what came back to me was that Bob had gotten assurances from Bill, I think it's Bill Winters from JPMorgan, that all the collateral would move across.

So we moved 40 billion in one go, I don't recall the time, late afternoon or early

TSG Reporting - Worldwide (877) 702-9580

These aren't, you know, this is not, you know, this transaction is not getting processed like a normal transaction, you know, and securities moved till well after midnight.

And Barclays is expecting, you know, something greater than \$45 billion worth of securities or, you know, and the number we were expecting were in the neighborhood of 49 to 50 billion dollars worth of securities, assuming there were normal haircuts assign to the collateral.

They moved 7 billion in cash to our account. MR. STERN: Where are we in time?

Q. We are in the wee hours of Friday morning. You've been told by the ops. guys that 42 billion plus 7 billion in cash has come across.

A. Right. Okay. I'm pausing. I just want to remember. The closing is scheduled that afternoon, right? On Friday, the 19th, right? And I would have explained to Rich and Michael Klein kind of what happened, right?

So they had that information, and it becomes -- I'm not sure -- I'm not sure of the timing of it, if someone said anything to me or if it's a function of being in the room or, you know, it's becoming evident to me that the securities that came across in the -- from the Fed are the securities that are going to be in the -- now we're doing an Asset Purchase Agreement, we're not buying the broker-dealer, and the securities that we're going to purchase TSG Reporting - Worldwide (877) 702-9580

I'm trying to recall. That's very, very -- I remember going to the closing.

MR. STERN: You said something about telling Rich and Klein.

A. I told Ricci and Michael Klein that we didn't get all our securities, we got cash, we somehow have to complete the transaction, you know, don't know what it is we got in the way of collateral, you know, we need to get traders to look in at it. I'm not sure that we got collateral that was held by the Fed, I'm not sure we got collateral that was held by JPMorgan, I'm not sure about anything, right? You know, I'm very, very concerned that, you know, about what it was we had moved across.

Q. Okay.

A. Right? Someone explained to me, and I didn't know this at the time, and I'm in a room with a bunch of lawyers, that when, under repo law, in a bankruptcy, right, the collateral -- we're not getting -- that's not a transaction

that, the way we structured it, was a repo, right, a reverse repo for Barclays, that, you know, that's not going to unwind, that trade, you know, the Fed is going to be left with cash and we're going to be left with collateral and we didn't know what it was we had.

We didn't know what it was we had, the markets were tanking, the world was melting down, and there was a great deal of concern about what it was we -- what it was we had come across, and so I would have alerted Michael that we ended up with what we believed to be \$42 billion, or what the system said, we needed to get traders to look at it, and we got \$7 billion in cash.

Q. Michael is Michael Klein?

A. Michael Klein and Rich Ricci, okay?

A. Maybe Stephen King did. Maybe Stephen King did send it on. I don't know, right? You know, but Mike, like I said, Mike would be, as I indicated earlier, Mike would have some responsibility of managing a subset of this collateral that comes across. Stephen King works for Mike, so I'm not managing the collateral coming across.

A. It would have been Marty Malloy who's got to finance it. Stephen King and Mike Keegan who have to manage the risk.

- Q. In my own layman's terms, it sounds to me like your job is to get it in the house and somebody else's job to make money with it?
 - A. Absolutely. Absolutely.
 - Q. All right.

A. So Marty's got to worry about financing the assets. Mike Keegan and Stephen King have to worry about hedging it, managing the risk. Right?

Q. Moving into the Friday morning -actually, anytime during the Friday, did it ever
come to your attention that Barclays had
demanded from Lehman that additional sources of
value be found and turned over to Barclays,
other than the assets that were within the repo?

A. Yes, but no specifics, right? And I would have -- so, yes, right? I was aware that Barclays was looking to give value from the transaction other than the repo, right? And my experience with the repo, right, and the core information that Lehman had provided to us relative to kind of what they believed to be held at the Fed, right, forced me to be cautious about all information that we would have gotten from Lehman.

So the -- would have alerted Rich, Rich, you know, Lehman hasn't been able to produce a position report, reconcile bank accounts, reconcile stock record for weeks, right, so you need to be very cautious about value that they say exists.

Q. First Amendment to Asset Purchase Agreement. And do you have an understanding, in your view, is there a difference between an amendment to an agreement and a clarification letter, a clarification of the agreement?

MR. STERN: Objection to the form.

Q. I just want your view.

A. No.

Q. What was your understanding of how the clarification letter addressed the repo?

A. Don't recall. Right? You know, my perception at the time, this was all very fluid and evolving over the week's time, right?

People moving at -- things needing to happen very fast because the markets are melting down and -- and everyone wanting to effect a transaction to try to save jobs and a Lehman franchise and value for everybody, including the, you know, the piece that was going to go to the estate, right?

Q. Also including the piece that was TSG Reporting - Worldwide (877) 702-9580

HIGHLY CONFIDENTIAL - G. LaROCCA going to go to Barclays, right?

A. Yeah, absolutely.

Q. Did you have an understanding that the clarification letter changed the definition of the assets that were going to be purchased when you signed the clarification letter?

A. Not when I signed the clarification letter. Not at the time, okay? Subsequent, you know, we learned that the transaction as originally envisioned in the beginning of the week has changed a lot by the end of the week, right? Again, I can't give you specifics, but, you know, things you think you're buying that don't exist because the quality of the data or the uncertainty.

Q. But there came a point where you understand that -- where you came to understand that the clarification letter changed what was purchased?

A. Yes.

Q. And that point came after, at some point after you signed the clarification letter?

A. Yes.

Q. Was the fact that the clarification TSG Reporting - Worldwide (877) 702-9580

letter was changing what was going to be purchased explained to you at the time that you signed the clarification letter?

Let me withdraw that. Let me ask a more general question. When you signed the clarification letter, did anybody explain to you what its purpose was in the transaction?

A. At a high level that the terms of the transaction had changed.

Q. Was it described to you in any greater detail than at that high level, that the terms of the transaction had changed?

A. No, not that I can recall.

Q. Now, could you turn to paragraph 13 of the -- actually, first, if you don't mind, turn, please, to paragraph 9.

A. Of which agreement?

Q. Of the clarification letter. Page 4.

A. Did you say paragraph 9 or page 9?

Q. It's paragraph 9 located on page 4 of the clarification letter. Take a minute and read through that paragraph 9 to yourself, if you don't mind.

A. It's only one sentence.

A. No frame of reference at all.

Q. Did you have a frame of reference when you signed the agreement for paragraph 9?

A. No

Q. And would you take a look at paragraph 12, which is on page 5 of the agreement. And I'll read that into the record: It's entitled "Schedule 12.3," underscored, and it says, "Following the closing, the parties shall reasonably agree to an allocation of the purchase price (including the assumed liabilities) among the purchased assets for tax purposes and set forth such allocation on a Schedule 12.3 to be signed by the parties." Do you see that?

A. Yes.

Q. Do you know whether any such schedule has ever been prepared?

A. I have no idea.

MR. STERN: Objection to the form.

- A. Could you rephrase the question?
- Q. As part of the transaction, did you understand Barclays would be assuming liabilities?
 - A. Yes.
- Q. What liabilities did you understand Barclays would be assuming?
- A. I don't have a detailed understanding or I don't recall being privy to, you know, a detailed listing of all the liabilities that Barclays would assume, right? As a result of being in the area, right, you know, there was going to be severance packages that would need to be paid to Lehman employees, there would be compensation that would need to be paid to Lehman employees that we would retain, right? There would be cure payments that would have to go to third parties. You know, that's, you

- Q. But beyond knowing the fact of an assumption of liabilities, you did not know the amounts, correct?
- A. No, wouldn't have been privy to it, wouldn't have been involved in that aspect of it.
- Q. If you could go back to Exhibit 1, sir, the Asset Purchase Agreement, and turn, please, to page 35.
 - A. Did you say page 35?
- Q. Yes, sir. And the paragraph I'm talking about is paragraph 9.1(C), which is at the top of page 35. If you could read through that just sufficiently to tell us whether you've seen or focused on that language before?
 - A. No.

 - A. No, I have not.
- Q. Down the asset side of that financial schedule are certain classes of collateral and numbers attributed to those assets, correct?
 - A. Uh-huh.
- Q. When you were around -- you and I both have used different phrases to this today. When you were around and picked up the buzz of what was going on or you were nearby to what was going on, did you come to any understanding as to whether those amounts were negotiated with between Barclays and Lehman?

MR. WOOD: Oh, I'm sorry.

A. Because they didn't have systems. JPMorgan had turned the systems off. They didn't know the status of their trades. They hadn't been able to reconcile bank accounts. They hadn't been able to reconcile the stock record.

So I found the information that was conveyed to be not credible. There was a problem with everything that we got from Lehman during that week. The data was not credible.

- Q. When you said the calculation hadn't been done in a while, do you recall how long it had been since the calculation had been done?
 - A. No. At least a week.
- Q. Do you recall when you first learned that excess assets beyond the 15c3-3 requirement might be transferred to Barclays?

A. Probably after the close. You know, after the closing. I didn't know it was part of the deal at the time.
